Sodium Chlorite Water Treatment CAS 7758-19-2

Sodium Chlorite Water Treatment Product Description

Sodium Chlorite Water Treatment
1.Cas no:7758-19-2
2.Appearance:white crystal or crystal powder
3.Purity:80%min
4.Package:250kg drum or 1250kg/IBC

Sodium Chlorite Water Treatment Specifications

Item	Solid Sodium chlorite	Liquid Sodium chlorite
Sodium chlorite %≥	78% 80% 82% 90%	25% 30%
Sodium chlorate %≤	4.0	2.0
Sodium chloride %≤	17.0	9.0
Sodium hydroxide %≤	3.0	1.5
Sodium carbonate %≤	2.0	1.0
Sodium sulfate %≤	3.0	1.5
Sodium Nitrate %≤	0.1	0.1
Arsenic %≤	0.0003	0.0003
Remark:	contents of impurities are on Sodium chlorite 80%min basis	

Sodium Chlorite Water Treatment Application

Sodium chlorite is a kind of latest, efficient bleacher and bactericide. Previously, it is applied to bleach flax, cotton, fibres, textiles etc. Sodium Chlorite has been expanding its using fields with the running raise of people's concept, especially the further application of the fourth generation disinfectant (ClO_2) on medicine and health, food-processing, aquaculture, drinking water disinfection, industry water treatment, dry flower procedure and so on.
